

Typo3 Search Engine Optimization

“Getting your Web Site Noticed” is an important element of Search Engine Optimization (SEO) for Typo3 installation. Since Typo3 is such a popular, flexible, open-source, enterprise-level, Content Management System (CMS), there are many ways to ensure that your basic framework (installation, configuration, and templates) are maximized to attract high levels of Web traffic. By properly organizing your keywords, images, and links, you can highlight your content, which will increase your Page Rank and draw customers and search engines to your Web site.
