

# WWW

The abbreviation WWW stands for World Wide Web and was developed by [Tim Berners-Lee](#). It is also known as “The Web”. The World Wide Web consists of all public Web sites that are connected to the Internet worldwide. You can get access to The Web through several Web browsers, the most popular ones are [Firefox](#) or [Microsoft’s Internet Explorer](#).

**The www is based on the following technologies:**

- \* [HTML - Hypertext Markup Language](#)
- \* [HTTP - Hypertext Transfer Protocol](#)
- \* [Web servers](#) and [Web browsers](#)
